

# The Faces of Terrorism: Multidisciplinary Perspectives

An international, multi-disciplinary team explores the many different facets of terrorism, investigating what it means to be a terrorist and what terrorism means for society. Gets closer to the perspectives of terrorists - their views, how their acts are conceptualized by the public and by national leaders, and how this knowledge can be put to use. Brings together international experts from psychology, psychiatry, law and policing. Edited by one of the world's foremost forensic psychology experts, David Canter.
